DESCRIPTION OF TECHNICAL INNOVATIONS (SMART HOME) OF THE COMPLEX

1. PURE WATER-WATER TANKS.

Each house has a separate water system which is guaranteed by proprietary clean water tank volume from 20 to 25 cubic meters. Each tank has a chlorination system for water conservation. It also has a provision for future connection to the water network in the village.

2. IRRIGATION - RAINWATER COLLECTION TANKS

Throughout the complex there is an automatic irrigation system which is secured by two rainwater collection tanks with total volume of 570 cubic meters. In case of drought there is a socket for tank filling from tanker truck.

3. DRAINAGE SYSTEM - WASTEWATER TANKS

Each house has two watertight tanks, a main tank (from 30 to 60 cubic meters) and an auxiliary (9 cm and above). In the main tank is collected the sewage, while the auxiliary serves for removing sewage by tanker. There is an audible and visual alarm when the main tank has reached approximately 80% of its capacity and the wastewater needs to be pumped to the auxiliary tank for removal.

4. POOLS WATER SUPPLY

For the supply of water to the pools there is a socket for connection of tanker trucks in front of the property, controlled by a separate valve near each pool. The pools are compact type with low maintenance costs.

5. HEATING-AIR CONDITIONING

Each house has separate heating and air conditioning system which is provided by hi-tech, energy class A+ devices. Alternative cooling is also provided by low power consumption roof fans.

6. THERMAL AND SOUND INSULATION

The houses have insulation complies with latest regulations. The frames are wooden, double glazing with high thermal and sound insulation capacity.

4. Antiparos Island

Where beauty well exceeds its size Antiparos is known for its distinctive Cycladic beauty. The island offers 57km of stunning shoreline and is blessed with a striking, natural beauty, crystalline emerald waters, golden sandy beaches and other extraordinary natural wonders.

It is a relaxing escape with thrilling outdoor adventures and unforgettable sightseeing experiences. The calm, Cycladic landscape is scattered with many picturesque churches and chapels, narrow cobbled stone alleys and streets, white-washed houses decorated with thriving pink and purple bougainvilleas and shadowy eucalyptus trees, all creating an enchanting atmosphere. the Antiparos Cave, with a collection of stalactites and stalagmite, the Venetian Castle (Kastro), lying in the center of Antiparos Town, the archeological site in the islet of Despotiko and the many villages and settlements that will give you a taste of what the island has to share.

Although Antiparos is untouched by mass tourism and it has preserved its agricultural and fisherman character, it is not just for relaxing. In the summer the island comes to have one of the most live and classy day and night life, with plenty restaurants, taverns and bars. It is not by chance that the island became the attraction of the Greek and international jet set, with personalities like **the acclaimed actor Tom Hanks and the majority of Greek shipowners and artists**. Organized boat tours, hiking, cycling, scuba diving, snorkeling, windsurfing and kite surfing, are just a few ways you can appreciate and experience the natural beauty of the island and the sea.

• The archeological site of Despotiko island

Agios Giorgios (Saint George)

• Areal view of Agios Georgios. The Blue Villas position is marked by a red arrow.

Agios Georgios is one of the most beautiful parts of the island, thanks to its secluded location, virgin nature, sandy beaches, dramatic rocks and unforgettable sunsets. The village is facing the uninhabited island of Despotiko (archeological site) and is a ten-minute drive from Antiparos port. The beach of Agios Georgios is a picturesque sheltered bay where you will find many taverns with excellent seafood, and you can also enjoy a boat trip to the nearby islands, as well as the amazing turquoise-coloured sea caves on the southern tip of the island (five minutes boat-ride from Saint George).

The gulf of Agios Georgios is an exceptional natural shelter for yachts, with numerous celebrities both domestic and international flocking every year among the Prince of Monaco.
